

THOMAS BELL-WRIGHT

A PHENNA GROUP COMPANY

In accordance with UKAS accreditation to ISO/IEC 17065
Certification is Hereby Granted

to

Alucopanel Middle East LLC

P.O. Box 416557, National Industries Park,
Dubai, United Arab Emirates

for

“Alucopanel® A2”

**4 mm thick Aluminium Composite Panel
Roof Covering Assembly**

(Classification according to EN 13501-5:2016)

which, subject to limitations described on the following pages and continued
listing on www.tbwcert.com, complies with Product Certification Scheme

*SD03 Exterior Wall Assemblies, Curtain Walls, Building Materials,
Products & Assemblies*

In witness whereof, this Certificate is issued this 30th day of August 2024

Sandy Dweik

Sandy Dweik
Chief Executive Officer

“Alucopanel® A2”

4 mm thick Aluminium Composite Panel Roof Covering Assembly

- A. Certification is given for “Alucopanel® A2” 4 mm thick Aluminium Composite Panel Roof Covering Assembly for Reaction to Fire classification according to EN 13501-5:2016 “Fire classification of construction products and building elements – Part 5: Classification using external fire exposure to roofs tests”, subject to the limitations stated herein. The summary of the scope of certification is stated below.

Table 1. Summary of the Scope of Certification

Product Name/Reference	Reaction to Fire Performance		Report Reference
	Result	Standard	
“Alucopanel® A2” 4 mm thick Aluminium Composite Panel Roof Covering Assembly	B _{ROOF} (t4)	EN 13501-5:2016	FIRES-CR-032- 21-AUPE

- B. Readers of this document should be familiar with the fire test standard and the requirements of ISO/IEC 17065:2012. The Certification will be listed on www.tbwcert.com while it remains current. This Certification is not valid if it is not so listed.
- C. The product is approved based on TBWIC Product Certification Scheme SD03 Exterior Wall Assemblies, Curtain Walls, Building Materials, Products & Assemblies (Issue 11), which includes pre-test sampling, evidence of performance (under report reference(s) in Table 1), Technical Verification and Proof of Performance, compliance to Factory Production Control requirements and surveillance & Re-certification Inspection/Audits.
- D. Limitations
- D.1. This Certification covers the specifications of the products as described in Sections E.
- D.2. The test standard covered under this Certification was used to measure the response of materials, products, or system assemblies to heat and flame under controlled conditions. The results described in each particular test report on its own shall not be used as the sole criteria for fire-hazard or fire-risk assessment of the materials, products, or system assemblies under actual fire conditions.
- D.3. No variations are allowed in material composition and manufacturing process unless recognised and approved by this Certification.
- D.4. This Certification is valid only for the fire performance of roof assembly when subjected to external fire exposure. Internal fire exposure is not considered.
- D.5. Panels shall be fastened to structural supports with panel joints secured with fasteners.
- D.6. The classification is valid for the following configurations:
- Roof pitch: greater than 10° and up to 70° inclination from the horizontal plane
 - Deck type: Installations without continuous deck
 - Supporting structure: Aluminium profile supports (non-combustible)

Certificate No.: TBW0300739

Seal No.: 102146

Issued: 30 Aug 2024
Valid to: 18 Aug 2027

D.7. This Certification does not address the following:

- a. Air and Water Permeability
- b. Measurement of heat transmission
- c. Effect of aggravated flame spread behaviour of an assembly resulting from the proximity of combustible walls and ceilings
- d. Classification or definition of material as non-combustible
- e. Any Resistance to Fire rating
- f. The toxicity level of smoke developed during combustion
- g. Fire propagation characteristics when tested as large-scale façade cladding assembly

Figure 3. Section B-B

1. Roof Covering Element

1a. Aluminium Composite Panel

Aluminium Composite Panel formed into a “tray profile”, with 300 mm high flanges on the exterior and 20 mm on the panel joints, shall be mechanically fixed to the structural support framing along the vertical and horizontal joints. Refer to Table 2 below for the details of the ACP panel.

Table 2. Aluminium Composite Panel Details

Reference	“Alucopanel® A2”
Panel Thickness	4 ± 0.2 mm
Weight Per Unit Area	8 ± 0.5 kg/m ²
Exterior Facing (top skin)	0.5 mm thick (minimum), Aluminium Alloy 3105-H16, 27 microns thick (maximum) Polyvinylidene Fluoride (PVDF) coating
Interior Facing (bottom skin)	0.5 mm thick (minimum), Aluminium Alloy 3105-H16, 7 microns thick (maximum) Polyester (PE) coating
Core	Material: Mineral-filled inorganic core Thickness: 3 ± 0.1 mm Density: 1800 ± 10 kg/m ³
Adhesive	Material: “High molecular content polymer adhesive” Thickness: 70 ± 2 microns Density: 920 ± 10 kg/m ³

1b. Panel Joint Seal

A gap of 20 mm shall be maintained between the joints of the panels. The joints shall be fitted with an aluminium (Alloy 6063-T6) “U” channel, 15 × 15 × 15 × 1.3 mm (web × flange × flange × thickness), fixed with Ø4.6 × 38 mm self-drilling hex head screws and capped with Silicone-based sealant DOWSIL™ 813C, applied at a nominal depth of 6 mm, extruded smoothly and flush with the exterior surface of the ACP cladding.

2. Cladding Fixing

Aluminium (Alloy 6063-T6) angles, 20 × 20 × 50 × 1.5 mm (leg × leg × length × thickness), shall be fixed on flanges of the tray using 2 nos. of Ø4 × 21 mm aluminium blind rivets within 100 mm from the corners and at 50 mm centres nominal spacing. The angles shall be fixed to the sub-framing using Ø4.6 × 38 mm self-drilling hex head screws.

3. Framing

3a. Sub-frame

Description: Aluminium angle

Material: Aluminium, Alloy 6063-T6

Dimension: 40 x 40 x 3mm (leg x leg x thickness)

Fixing:

- Fixed to the structural support using Aluminium (Alloy 6063-T6) angle, 40 x 40 x 37 x 3 mm (leg x leg x length x thickness), fastened with 4 nos. of Ø4.6 x 38 mm hex head self-drilling screws
- The intersection between sub-frames shall be fastened using Aluminium (Alloy 6063-T6) angle, 40 x 40 x 37 x 3 mm (leg x leg x length x thickness), fastened with 4 nos. of Ø4.6 x 38 mm hex head self-drilling screws

3b. Structural support - Type 1

Description: Rectangular hollow section profile

Material: Aluminium, Alloy 6063-T6

Dimensions: 200 x 100 x 3 mm (width x depth x wall thickness)

3c. Structural support - Type 2

Description: Rectangular hollow section profile

Material: Aluminium, Alloy 6063-T6

Dimensions: 20 x 40 x 3 mm (width x depth x wall thickness)
